# **Original Warendorfer Horse balm**

The original Warendorf horse balm is known throughout Germany and now also in many other countries.

It is beneficial for rubbing in and has long been a favourite and sought-after product for people.

Our Original Warendorf Horse Balm is a purely herbal combination of active ingredients that quickly relaxes and decongests muscles and tendons

## Extract: Customer reviews

Autor: Ernst S. 14.02.2015 ★★★★★

Warendorfer horse balm is two to three times more expensive than similar products from online pharmacies.

However, Warendorfer is obviously also several times better.

This is the impression I have gained after using several times.

## Horse balm and devil's claw

\*Moisturising

\*Contains no cortisone

\*Has an antiseptic effect

\*Anti-inflammatory

\*Natural ingredients

\*Vegan & cruelty-free

The synergistic effect of the ingredients of hemp, CBD, horse balm, and devil's claw contribute to the muscle-relaxing effect. A blessing after physical exertion.

CBD, hemp oil, and devil's claw have an antioxidant effect. They protect the skin from harmful free radicals and counteract premature skin ageing. The high hemp oil content in particular supplies the skin with moisture and helps to maintain its natural moisture balance. The soothing properties of CBD can help to reduce skin irritation and nourish the skin.

HCPT has been ethically developed without animal testing and is therefore vegan-friendly. It protects the skin through the perfectly balanced combination of hemp, CBD, horse balm, and devil's claw and increases the skin's natural defense system and its ability to regenerate.

# The new warming sports gel!

HOTGEL activates the metabolism on the skin.

The increased blood flow allows more oxygen, nutrients and metabolites to reach the affected areas.

It consists of a unique, trademark-protected warming active ingredient formula for heavily stressed muscles and joints! HotGel supports the relaxation of muscles, tendons, joints, shoulders, back and more with pleasant warmth.

## Properties:

- \* Muscle-relaxing and nourishing ingredients.
- \* Trademarked heat active ingredient 'Thermolat'.
- \* Soothing, sweet-smelling gel.
- \* Contains no skin irritants (e.g. chilli).

## Recommended use of our HotGel:

Start with a small amount on cold-feeling areas and increase the amount as required .

Rub into the spine, muscles, etc., in the morning and evening.

## Sports activities:

After an intensive workout or strength training, apply a small amount of to the muscle area or the skin around the joints and massage in with circular movements.

Before physical exertion, the sports gel helps to warm up the muscles. This can prevent sports injuries such as pulled muscles.

It can be mixed with other products.

# *Professional hand cream in a class of its own*

In industry and at work, many factors remove moisture from the hands.

e.g:

- ▶ Bricklayer - through lime or cement
- ▶ Car mechanic - oil work
- ▶ Nurse - handling with medicines
- ▶ and much more.

Or:

- ▶ Gardening and housework often involve aggressive cleaning agents or chemical substances on the hands.
- ▶ In many professions, it is necessary to wash your hands constantly
- ▶ In other professions, you are constantly exposed to the weather
- ▶ and much more.

The consequences are quickly dehydrated skin.

The dehydration causes cracks or even breaks in the skin.

The hand feels taut and unfortunately looks older and older as a result.

The Hago industrial and professional hand cream has been specially developed for these users.

By combining many natural ingredients, we have succeeded in creating a long-lasting feeling of freshness.

Dry and brittle hands regain the moisture they need, especially when the hands are subjected to heavy use.

**The  
industry  
hand cream  
is in a new  
development.**
